Popcorn Factors

The Popcorn Revenue Coverage (Pilot) Crop Provisions specify that projected and harvest prices shall be the “price for grain type corn determined in accordance with the [CEPP] multiplied by a factor...” The factor converts the conventional per bushel corn price into a per pound popcorn price for the following plans of insurance: Area Yield Protection; SCO Yield Protection; Revenue Protection; Area Revenue Protection; SCO Revenue Protection; Revenue Protection with HPE; Area Revenue Protection with HPE; and SCO Revenue Protection with HPE. The Special Provisions of Insurance contain similar language for the projected price for Yield Protection. The following conversion factor is applicable for the 2019 CY:
