All Other Interested Parties

FROM: Martin R. Barbre /s/ Keith Gray, for 11/27/2018
Administrator

SUBJECT: High-Risk Alternative Coverage Endorsement Modifications – 2019 and
Succeeding Crop Years

BACKGROUND:

The High-Risk Alternative Coverage Endorsement (HR-ACE) allows policyholders to insure high-risk acres at a coverage level that is lower than the coverage level on their non-high-risk acres (as an optional endorsement to a Federally reinsured corn, soybean, wheat, or grain sorghum crop provisions). The HR-ACE is available in counties with a high-risk classification in Arkansas, Illinois, Indiana, Iowa (excluding the 35 counties that fall into the Prairie Pothole National Priority Area), Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nebraska (limited to counties east of Holt County), Ohio, and Tennessee.

There are two modifications to HR-ACE.

- 1) Enterprise units by practice are allowed. The previous issuance of HR-ACE did not allow for enterprise units by practice; and
- 2) Policyholders may elect and qualify for a unit structure on HR-ACE that is independent of their unit structure election on the base policy. The previous issuance of HR-ACE limited the election and qualification of enterprise units on HR-ACE to only those insureds who elected and qualified for enterprise units on the base policy.

These modifications will be effective for crops with a contract change date on or after November 30, 2018 for the 2019 crop year.

ACTION:

RMA will place, by close of business today, the HR-ACE for the 2019 crop year on the RMA website at www.rma.usda.gov/.

Interested producers should contact a crop insurance agent for further information. A list of agents can be found on the Risk Management Agency (RMA) website at www.rma.usda.gov/.

DISPOSAL DATE:

December 31, 2019.
