INFORMATIONAL MEMORANDUM: PM-19-029

TO: All Approved Insurance Providers
All Risk Management Agency Field Offices
All Other Interested Parties

FROM: Richard H. Flournoy /s/John W. Underwood for
Deputy Administrator

SUBJECT: California Prune Counties – 2019 Crop Year Prune Reference Date and
Average Dry Count per Pound

BACKGROUND:

This Informational Memorandum establishes the 2019 crop year Prune Reference Date. In addition, it provides Approved Insurance Providers with the average dry prune count per pound for calculating second-period immature prune appraisals.

Each year the Davis Regional Office (DRO) establishes the Prune Reference Date. This date occurs one to two weeks after prune pit tip hardening when 80 to 90 percent of the seed shows the presence of endosperm, a clear jelly-like substance at the bloom end of the seed.

The DRO also annually compiles prune industry data to determine the average dry prune count per pound for second-period immature appraisals. The appraised production to count for second-period immature appraisals uses the average dry prune count.

ACTION:

Effective for the 2019 crop year:

- 1) The Prune Reference Date for all applicable California prune counties for the 2019 crop year is May 8, 2019; and
- 2) The following tables shall be used to calculate second-period immature appraisals.

INFORMATIONAL MEMORANDUM: PM-19-029

County	Dry Prune Count
Butte	60
Colusa	58
Fresno	61
Glenn	57
Madera	61
Merced	61
Santa Clara	61

County	Dry Prune Count
Solano	57
Sonoma	57
Sutter	58
Tehama	58
Tulare	60
Yolo	57
Yuba	60

For counties not included on this list that insure prunes by written agreement, contact the DRO for the applicable dry prune count per pound.

DISPOSAL DATE:

December 31, 2019.
